Task allocation sheet

Reinforcement Learning Formative Assignment | Atari Pac-Man DQN

Hamed

10 DQN hyperparameter experiments; model checkpoints and metrics; results table.

Andrew

10 DQN hyperparameter experiments; model checkpoints and metrics; analysis and results table.

Heroine Mutumwinka

10 DQN hyperparameter experiments; model checkpoints and metrics; training plots and results table.

Mahamat Bakhit

Fourth set of 10 DQN experiments and results table; final integration and verification.

Shared deliverables

Custom CNN DQN, Atari preprocessing, replay buffer, and training code.

uv project setup, greedy model evaluation, play.py, README, training plot, and gameplay video.

Final model selection must be repeated after Mahamat Bakhit completes the fourth set of runs.

Allocation reflects work visible in the repository and the fourth-member plan as of 12 November 2026.
